

COMPUTER-AIDED ENGINEERING IN RAW MATERIAL PROCESSING AND PARTICULATE MEDIA INDUSTRIES

EVENT DETAILS

This event aims to bring together and connect the computer-aided engineering (CAE) community focused in raw material processing and particulate media industries. It is scheduled as a one-day conference-style event with serial presentation sessions, including discussions, followed by a closing evening event.

The primary language of the conference will be English – which is not only in the sense of CAE but is encouraged as international guests are warmly welcome.

Interested speakers/authors are invited to submit a (preliminary) title, optionally with a short clarifying description of their contribution. Presentations are scheduled for about 20 min., with no specific formal requirements.

Deadline for submission is Sept. 15 – Notification of acceptance is Sept. 22.

Accepted speakers/authors are invited to contribute to the proceedings in a format and extent of their own choice (one-page/extended abstract / graphical abstract / slide highlights / concise paper) by Nov. 24.

Interested authors are given the option of extending their contribution to be published in the assigned special issue of the renowned journal BHM (Berg- und Hüttenmännische Monatshefte; Springer) following the conference.

The conference fee is 90 Euro.

Speakers and students are exempt from the conference fee.
